

# EXPLORE: CLIMATE JUSTICE DATA SETS

## WHY DATA SETS?

Explore and analyze the following data sets to better understand climate justice on local, national, and international levels and through various lenses, including agriculture, forestry, public health, and socio-economic status.

## DATA SETS

[Which U.S. cities prioritize justice in climate action?](#)

[Is the United States government doing enough to reduce energy poverty?](#)

[Health impacts from oil and gas production in the United States](#)

[CDC Environmental Public Health Data](#)

[FEMA National Risk Index Map](#)

[Agriculture data sets](#)

[Climate and Economic Justice Screening Tool](#)

[Socioeconomic Data and Applications Center](#)

[Forest Monitoring Designed for Action \(Global Forest Watch\)](#)

[Environmental Public Health Tracking Network](#)

[System for the Triage of Risks from Environmental and Socio-Economic Stressors](#)

[NOAA Data Search](#)

## DATA HUBS

### NASA EARTH DATA

[Environmental Justice Data Catalog \(XLS\)](#)

### EPA

[Environmental Dataset Gateway \(via Data.gov\)](#)

[EJScreen](#)

### EJ ATLAS

## SUGGESTIONS FOR USE

**REFLECT** on the story this data tells.

**ANALYZE** this data. What research can you do with it, what research still needs to be done? Does this data set include justice based issues? How could justice be better included?

**ASK QUESTIONS** about climate justice in your community or country.

**TAKE ACTION** to make sustainability more inclusive.
